PROFESSIONAL EXPERIENCE

Full Stack Developer

Abelian Group AB

Nov 2025 – Present

- Develop and maintain a C#/.NET Excel VSTO add-in, working with complex Excel COM integrations.
- Improve performance, troubleshoot technical issues and contribute to the product's ongoing development.

Senior Software Developer

Optiquequeue Nordics AB

Jan 2023 – Nov 2025

- Owned frontend development for a consumer platform with 100,000+ paying users, including architecture and product delivery.
- Built reusable frontend components and application state flows; implemented analytics, server-side tracking and A/B testing.
- Built a feature-complete React Native prototype of the existing web application, including BankID authentication, interactive maps with queue locations, and all core user flows and screens.

Developer

Dataväxt AB

Mar 2021 – Jan 2023

- Played a key role in developing a Flutter app and maintained an existing Cordova application.
- Took additional ownership of iOS development, debugging and platform-specific issues.
- Built a reusable design system and solved longstanding technical issues in a backend-focused team.

Android & Web Developer / Team Lead

The Farm AB

Jan 2015 – Mar 2021

- Built multiple native Android apps from scratch in Java, including in-app purchases and client-specific features.
- Developed React Native apps and payment flows across mobile projects.
- Led technical delivery, planning, prioritization and client communication across mobile and web projects.
